

Windows XP/ME/Vista/7/8

CT-550 Software Download

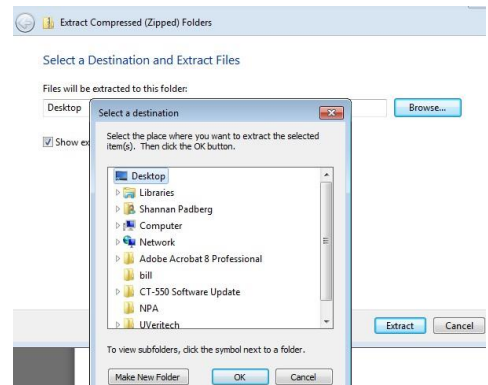

Unzipping the Files and Installing the Driver

From the FraudFighter.com website, you will be directed to download a zipped folder called “CTScanner_ZIP_FILE” containing 4 files (including a copy of this instructions document).

Important! Do not “run” the ZIP file, because this will automatically extract the files and save them into your downloads folder, which you may not be able to find later. Instead, be sure to “Save” the ZIP folder onto your desktop.

After successfully downloading and saving the zip file:

1. Right mouse click on the ZIP folder and click “Extract All”. Click Browse and select to save the files to your Desktop. This will create a folder on your desktop called “CT550 Nov 13 Website Files”

2. Open the new folder “CT550 Nov 13 Website Files”. There are four files inside the folder. Three of these are used for performing the update, and the fourth is a PDF copy of these instructions.

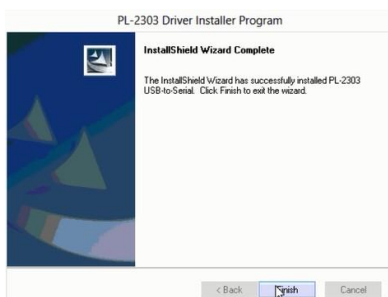

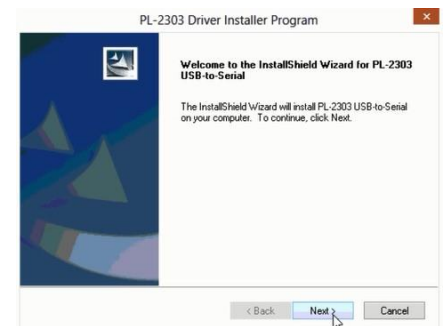

Name	Date modified	Type	Size
Auto Download Software(10)	9/5/2011 6:06 PM	Application	376 KB
CT550_US_CAD_EUR(2013 Update).UPL	2/1/2013 8:18 AM	UPL File	32 KB
PL2303_Prolific_DriverInstaller_v1.8.0	2/26/2013 10:40 AM	Application	3,136 KB

Software loading tool
Driver → Software

3. The next step after downloading and saving to your desktop is to install the driver. Installing the driver will only take a few seconds.

Double click the **PL2303_Prolific_DriverInstaller_v1.8.0** file and click next.

Important! Your operating system may open a security window (User Access Control). If this happens, you should grant permission to allow the driver to be installed.

4. Then click finish to complete the installation of the driver.

Next you will need to prep your unit for the software installation

5. Plug your unit in using the power supply that was provided.

Important! The device will not update if it is not plugged-in.

6. Attach the USB cable into the back of the unit and the other end into the computer USB port. (The diagrams below display a CT-550 unit. Your model may vary)

Your computer should “recognize” the device when you plug it into the USB port. Depending on your operating system, you may see a pop-up telling you the driver is being installed.

7. You will need to power-on the unit in “download mode”. To do this, you will press and hold the “CLR” key and POWER key together at the same time. Twelve dashes (“-”) should appear on the display window.

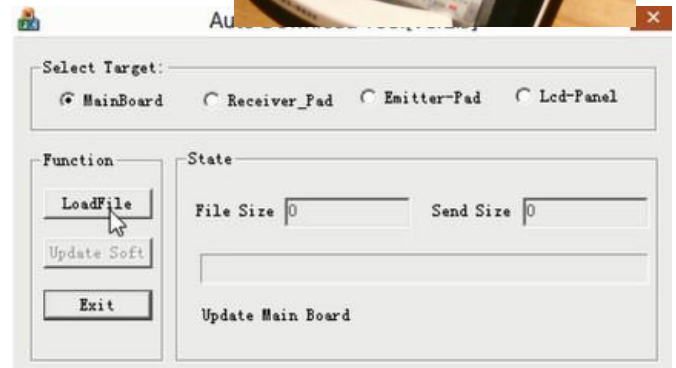

You are now ready to install the new software on your unit

8. Double click on the “CT_Scanner_Update_Loader_Application” file you saved to your desktop after unzipping the files from the FraudFighter website.

Important! Your operating system may open a security window (User Access Control). If this happens, you should grant permission to allow the program to run.

The software will open a dialogue window, as seen to the right. The radio button “Select Target” should default to “Main Board”. If the “Main Board” button is not selected, please do so. Next, click the “Load File” button. The load file button allows you to select the new currency software file that you wish to upload to your CT550/2000 scanner.

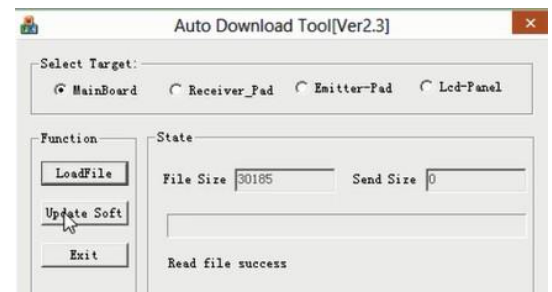

9. After clicking the “Load File” button, a window will open allowing you browse your computer and select the UPL file (CT550_C06_EUR_USD_CAD_(2013-10-31).UPL) which you saved to your desktop when you unzipped the folder downloaded from FraudFighter.com. Select the UPL file, and click Open.

10. At the bottom of the Auto Download Tool is will say “Read file success”. Next, click “Update Soft”.

11. The update will only take a few seconds, when it is complete the unit will power off and the Auto Download Tool will read “Program Target Success!”

12. Exit out of the Auto Download Tool and unplug your unit. Your unit is now ready for use!

When you Start the Unit, you should see “C06” displayed on the screen.
