

# CT-250

## Digital Counterfeit Detector For US Dollars

The **CT-250** is a fully automatic counterfeit bill detector that does not require the operator to have any bill authentication knowledge. Utilizing 5 separate physical document measurements, the **CT-250** identifies the denomination of the banknote and displays the result on the LCD screen. Remarkably fast and easy to use, the **CT-250** can be configured to count the total quantity of the bills tested, or simply display the value of the most recent banknote tested.

### PRODUCT FEATURES

- Detection for US Dollars, EU euros, British pounds, and many more
- Feed bills in one direction\*
- Automatic recognition of denomination
- Quick and Simple to use - just feed the bill and see the result
- Currency software can be updated when new designs are released
- Optional lithium battery available for portable usage

\*(FraudFighter™ CT-600 allows multi-directional bill-feeding, if this function is required)
